SUMMARY

Software engineer with 1+ year of experience building REST services in Java on AWS, plus a 6-month SDE internship. Strong in data structures and algorithms (550+ LeetCode problems), object-oriented design and writing well-tested, maintainable code.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL

Backend: Spring Boot, REST APIs, JUnit, Mockito, OpenAPI

Databases: PostgreSQL, DynamoDB, Redis

Cloud & Tools: AWS (EC2, S3, Lambda, SQS, DynamoDB, CloudWatch), Git, Docker, GitHub Actions

Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

EXPERIENCE

CloudKart Technologies **Pune, Maharashtra**
Software Engineer *Jul 2025 – Present*

- Designed and built 8 REST APIs in Java (Spring Boot) for order and inventory services handling 1.2M requests per day on AWS (EC2, ALB).
- Moved order-history queries from PostgreSQL to DynamoDB with a redesigned access pattern, reducing average read latency from 420 ms to 90 ms.
- Wrote 150+ JUnit and Mockito tests, raising service code coverage from 58% to 86%, and added test gates to the GitHub Actions pipeline.
- Debugged production issues using CloudWatch logs and metrics; fixed a retry-storm bug that caused intermittent 5xx errors.
- Took part in design and code reviews and documented API contracts with OpenAPI.

CloudKart Technologies **Pune, Maharashtra**
SDE Intern *Jan 2025 – Jun 2025*

- Built a notification service using SQS and Lambda that sends order-status emails, processing about 50K messages per day.
- Added Redis caching for the product catalog, improving page load time by 35%.

PROJECTS

Distributed Rate Limiter | Java, Redis, Docker **github.com/karan-d-demo/ratelimiter**

- Implemented token-bucket and sliding-window algorithms as a standalone service with a REST API.
- Load-tested to 5,000 requests per second on a 3-node setup using Redis for shared state.

Campus Events Platform | Python, Django, PostgreSQL **2024**

- Built a platform for event registration used by 2,000+ students, with role-based access and automated tests.

EDUCATION

Western India Institute of Technology **Pune, Maharashtra**
B.Tech in Computer Science and Engineering (CGPA: 8.6 / 10) *2021 – 2025*
Relevant coursework: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Distributed Computing

ACHIEVEMENTS

- Solved 550+ problems on LeetCode; 4-star coder on CodeChef.
- Winner, Inter-College Hackathon 2024; Best Intern Award at CloudKart Technologies (2025).
